

HARSHIT THAKUR

Senior Full Stack Developer · React.js · Node.js · MERN Stack

Bengaluru, India (open to relocation — Dubai, UAE) | +91 7903988459 | harshitmi4@gmail.com

[LinkedIn](#) | [GitHub](#) | [Portfolio — harshitthakur007.github.io](#)

PROFESSIONAL SUMMARY

Senior Full Stack Developer with 5+ years of experience building scalable, high-performance web applications, specializing in React.js and the MERN stack (MongoDB, Express.js, React, Node.js). Core contributor to an enterprise micro-frontend platform of 10+ independently deployable React modules serving telecom clients across 6 countries. Deep experience in authentication at scale (Keycloak SSO, RBAC, multi-tenant IAM), real-time dashboards for 50,000+ daily active users, reusable UI component libraries, and Cypress E2E automation. Comfortable across the stack — TypeScript, Node.js, REST APIs, Docker/Kubernetes, AWS/Azure — and currently building an AI-powered MERN product with LLM integration.

CORE SKILLS

Frontend (Expert): React.js, Redux, TypeScript, JavaScript (ES6+), Micro-Frontend Architecture, HTML5, CSS3/SCSS, Tailwind CSS, Responsive Design, Webpack, Canvas API

Backend: Node.js, Express.js, REST API Design, Microservices, Spring Boot, Keycloak (SSO, RBAC, IAM)

Databases: MongoDB, MySQL, Database Design, Query & Performance Optimization

Testing & Quality: Cypress (E2E), Test-Driven Development, Debugging, Data Structures & Algorithms

DevOps & Cloud: Docker, Kubernetes, GitLab CI/CD, AWS, Azure, Linux Scripting

AI Integration: OpenAI API, LLM-powered features, Prompt Engineering, AI-assisted Development

Ways of Working: Agile/Scrum, Jira, System Design, Code Reviews, Cross-team Collaboration

PROFESSIONAL EXPERIENCE

Senior Software Engineer — 6D Technologies, Bengaluru

Mar 2023 – Present

- **Own frontend development on One-UI**, an enterprise micro-frontend platform of 10+ independently deployable React modules powering telecom products for clients across 6 countries.
- **Integrated Keycloak (v19–v26) for Identity & Access Management** — single sign-on, role-based access control, and multi-tenant provisioning across diverse client deployments.
- **Built a Web Filtering Dashboard** visualizing real-time traffic for 50,000+ daily active users; improved query performance by 30%.
- **Maintain a reusable React UI component library adopted by 8+ product teams**; provide technical guidance to external integration teams consuming the components.
- **Review pull requests and mentor junior engineers**, upholding code quality and frontend best practices across the team.
- Partner with architects and product owners to translate complex telecom business requirements into performant, maintainable frontend features.
- Diagnose and resolve complex production issues, sustaining high system uptime and smooth releases.

Software Development Engineer — Lavelle Networks, Bengaluru

Mar 2022 – Nov 2022

- **Developed a Web Filtering Dashboard** with interactive time-series graphs analyzing traffic volume, top domains/categories, and per-user access metrics by browsing duration and data usage.
- **Engineered a Resource Utilization Dashboard** tracking real-time and historical CPU, disk, and memory utilization (average, peak, current) across network devices.
- Enhanced an SD-WAN controller with an advanced reporting framework, optimized authentication-server priority logic, and robust inter-network group policies.

Software Development Engineer — CSG Systems International, Bengaluru

Jul 2020 – Feb 2022

- **Contributed to Ascendon Rating & Charging**, a cloud-based SaaS platform delivering real-time online charging for global wireless and digital services.
- **Built and shipped features across core modules** using React.js, Redux, Angular, and HTML5/CSS3 on Azure cloud infrastructure.
- **Authored comprehensive Cypress end-to-end test suites**, significantly reducing production bugs across frequent SaaS release cycles.

Software Developer Intern — TechCiti Technologies, Bengaluru

Jan 2020 – Jun 2020

- Built "File Sharing with Two-Factor Authentication," a secure web application implementing robust 2FA for protected access to cloud file services.

PROJECTS

FinTrack — AI-Powered Personal Finance App — MERN + OpenAI

In development

- Building a full-stack MERN application that detects spending by parsing SMS and email transaction alerts, then uses an LLM to auto-categorize every transaction — giving users real-time, zero-manual-entry visibility into where their money goes.
- **Stack:** MongoDB, Express.js, React.js, Node.js, OpenAI API.

Interactive Portfolio Lab — harshitthakur007.github.io

Live

- Designed and built a portfolio featuring hand-crafted interactive browser experiments: a generative story engine with dynamic runtime theming and a canvas particle-physics playground — vanilla JavaScript, Canvas API, zero dependencies.

EDUCATION

MCA — Master of Computer Applications — PES University, Bangalore

2018 – 2020 · 7.2 CGPA

BCA — Bachelor of Computer Applications — Birla Institute of Technology, Mesra

2015 – 2018 · 7.0 CGPA

CERTIFICATIONS

- Integrated Program in Business Analytics — IIM Indore
- Namaste JavaScript & Namaste React — Akshay Saini
- The Complete JavaScript Course: From Zero to Expert
- AWS Basics — KodeKloud
