

Harshit Thakur

Senior Software Engineer | FrontEnd Developer | Bengaluru, Karnataka | Open to relocate to Dubai, UAE
+91790398845 | Harshitmi4@gmail.com | LinkedIn | GitHub

👤 Career Objective:

Software Engineer with 5+ years of experience building scalable, high-performance web applications using , React.js, and JavaScript. Proven experience delivering enterprise solutions, implementing Micro-Frontend architectures, and developing reusable UI frameworks for global clients. Strong background in authentication and authorization using Keycloak, cloud technologies (Azure, AWS), and Agile software development. Passionate about creating maintainable, user-centric applications and solving complex technical challenges.

📋 Experience Summary:

- Having **5+ years of experience** as a Software Engineer, worked experience in scalable web applications and enterprise solutions.
- Expertise in **JavaScript(ES6) , ReactJS**.
- Skilled in developing **RESTful APIs**, responsive front-end interfaces, and database-driven systems.
- Good working experience on **HTML5, CSS3 & Tailwind CSS**.
- Experience in **System Design**.
- Experienced with **Docker, Kubernetes**, and **CI/CD pipelines** for containerized deployments.
- Working experience in **TypeScript and NodeJs**.
- Good experience in **debugging** and resolving issues of application with solid **Data Structures & Algorithms**.
- Hands-on experience in **Linux** scripting for automation, deployment, and application maintenance activities.
- Experience using **GIT & Bitbucket**.
- Working experience on **Agile Methodology** (Scrum).
- Working experience on project tracking tools like **JIRA**.

📋 Employment History:

Software Development Engineer at 6D Technologies, Bengaluru

Mar, 2023 – Present

- Streamlined workflows and improved data management, resulting in faster processing and enhanced user experience.
- Maintained and enhanced '**One-UI**', a large-scale micro-frontend platform with 10+ independently deployable React modules, ensuring stable delivery for enterprise telecom clients across 6 countries.
- Integrated **Keycloak** (versions 19, 21, 25, and 26) for **Identity & Access Management**, delivering secure SSO, role-based access control (RBAC), and multi-tenant provisioning across diverse client deployments.
- Collaborated with architects and product owners to turn complex telecom business requirements into high-performance front-end features.
- Developed a Web Filtering Dashboard capable of visualizing real-time traffic data for 50k+ daily active users, optimizing query performance by 30%.
- Maintained and enhanced a multi-project **reusable UI library**, implementing new features as required and providing technical support to external teams integrating the components.
- Identified, debugged, and resolved complex application issues, ensuring high system uptime, code stability, and smooth production deployments.

Software Development Engineer at Lavelle Networks, Bengaluru

Mar, 2022 – Nov 2022

- Developed a Web Filtering Dashboard featuring interactive time-series graphs to analyze web traffic volume, top domain/category reports, and user access metrics based on browsing duration and data usage.
- Engineered a Resource Utilization Dashboard that monitors real-time and historical CPU, disk, and memory metrics, delivering precise tracking of average, peak, and current utilization across devices.
- Enhanced the SD-WAN controller by building an advanced reporting framework, optimizing authentication server priority logic, and implementing robust inter-network group policies.

Software Development Engineer at CSG Systems International, Bengaluru

July, 2020 – Feb 2022

- Contributed to 'Ascendon Rating & Charging', a cloud-based SaaS platform providing real-time online charging and scalable rating capabilities for global wireless and digital services.
- Developed and tested features across multiple core modules using React.js, Redux, Angular, and HTML5/CSS3, while leveraging Cypress for end-to-end testing and Azure for cloud infrastructure.
- Authored comprehensive end-to-end test suites using Cypress, significantly reducing production bugs and ensuring UI stability across frequent SaaS deployment cycles.

Software Developer Intern at TechCiti Technologies Pvt. Ltd, Bengaluru

Jan, 2020 – Jun 2020

Developed a secure web-based application titled "File Sharing with Two-Factor Authentication," implementing a robust 2FA mechanism to ensure data integrity and protected access for cloud computing services.

Skills:

Category	Skills
Programming Languages	JavaScript , java
Backend Technologies	Spring Boot, Microservices, REST API Development
Frontend Technologies	React.js, Redux, jQuery, HTML5, CSS3, SCSS, Tailwind CSS, Responsive Web Design
Databases & Caching	MySQL, MongoDB, Database Design, Performance Optimization
DevOps & CI/CD	Docker, Kubernetes, GitLab CI/CD, Containerization
Cloud Platforms	AWS, Asure
Tools & Platforms	Git, npm, Webpack, Postman
Project Management	Jira, Redmine
Methodologies	Agile/Scrum, Test-Driven Development (TDD), Software Development Lifecycle (SDLC)

Education:

MCA at PESUniversity, Bangalore

Aug, 2018 - Jun, 2020 - 7.2 CGPA

BCA at Birla Institute of Technology, Mesra.

Jul, 2015 - May, 2018 - 7.0 CGPA

Class XII: 74% | Class X: 80% at Kendriya Vidyalaya, Namkum, Ranchi.

Mar, 2007 - Apr, 2015

Others: Certifications & Achievements.

- Integrated program in business analytics at **IIM, Indore.**
- Crash Course: **AWS Basics** from **kodekloud.**
- **Namaste JavaScript & Namaste React** – Issued by Akshay Saini.
- The Complete **JavaScript** course 2021 from zero to expert.
- **“Selenium testing”** conducted by **Q-spiders.**
- **“Design Thinking”** conducted by BITES and Bumblebee.
- **‘C’ Certificate** in **NCC Air Wing** with Alfa (A) Grade.
- Served as **Secretary** of **Debating Society** at Birla Institute of Technology, Mesra.
